

Assignment Description

Create a final report that describes your:

- Problem statement
- Data source
- Exploratory data analysis
- Feature engineering
- Modeling process
- Modeling results
- Main insight (“big picture conclusion”)

The report should be a well-formatted, clear, and succinct description of your analysis and results. Include your main insight(s) in the report body, and move lengthy details (if any) to an appendix. There is no required report length, however ~5 pages for the main report (excluding appendices) is reasonable.

Create a brief presentation (**maximum 4 minutes**) that summarizes, at a high level, your analysis and key insight(s). Points will be deducted for any presentation exceeding 4 minutes.

Remote students will present by Zoom.

Deliverables

(30 POINTS) Final report

(10 POINTS) Final presentation
